Your store. Your way.
One complete retail POS.

Built from the ground up for everyday retail. From computer stores and fashion boutiques to department stores, hardware shops and supermarkets, GZamPOS brings checkout, stock, customers and business control together.

Illustrative retail scene (AI-generated).

Serve with confidence

A touch-friendly checkout built around everyday retail tasks.

See the bigger picture

Connect stock, sales and online reporting for better-informed decisions.

Make it your own

Configure screens, tenders, workflows and access to fit your store.

Modern retail. Practical control. More possibilities.

(345) 324-1105 **mreid@poweredge.ky** **www.gzampos.com**

Built around the way you retail.

One connected retail platform for a wide range of product-based businesses. Configure departments, products, pricing and permissions to suit your operation.

Computer & IT stores
Computers, peripherals, cables, accessories and everyday technology supplies.

Electronics & mobile accessories
Consumer electronics, headphones, chargers and phone accessories.

Department & variety stores
Organize a broad product range into clear departments and product catalogues.

Fashion, footwear & accessories
Clothing boutiques, shoe shops, bags, jewellery and fashion accessories.

Hardware & building supplies
Tools, fittings, paint supplies and home-maintenance merchandise.

Home, furniture & kitchenware
Household goods, furnishings, decor, appliances and kitchen essentials.

Beauty & personal care
Beauty supplies, cosmetics, hair products and personal-care retail.

Office, books & stationery
Office supplies, books, school essentials and stationery shops.

Gifts, toys & hobby shops
Giftware, souvenirs, toys, crafts and specialist hobby merchandise.

Sports, outdoors & pet supplies
Sporting goods, outdoor accessories, pet food and pet-care products.

Food, convenience & supermarkets
Groceries, mini-marts, convenience stores and other packaged-food retailers.

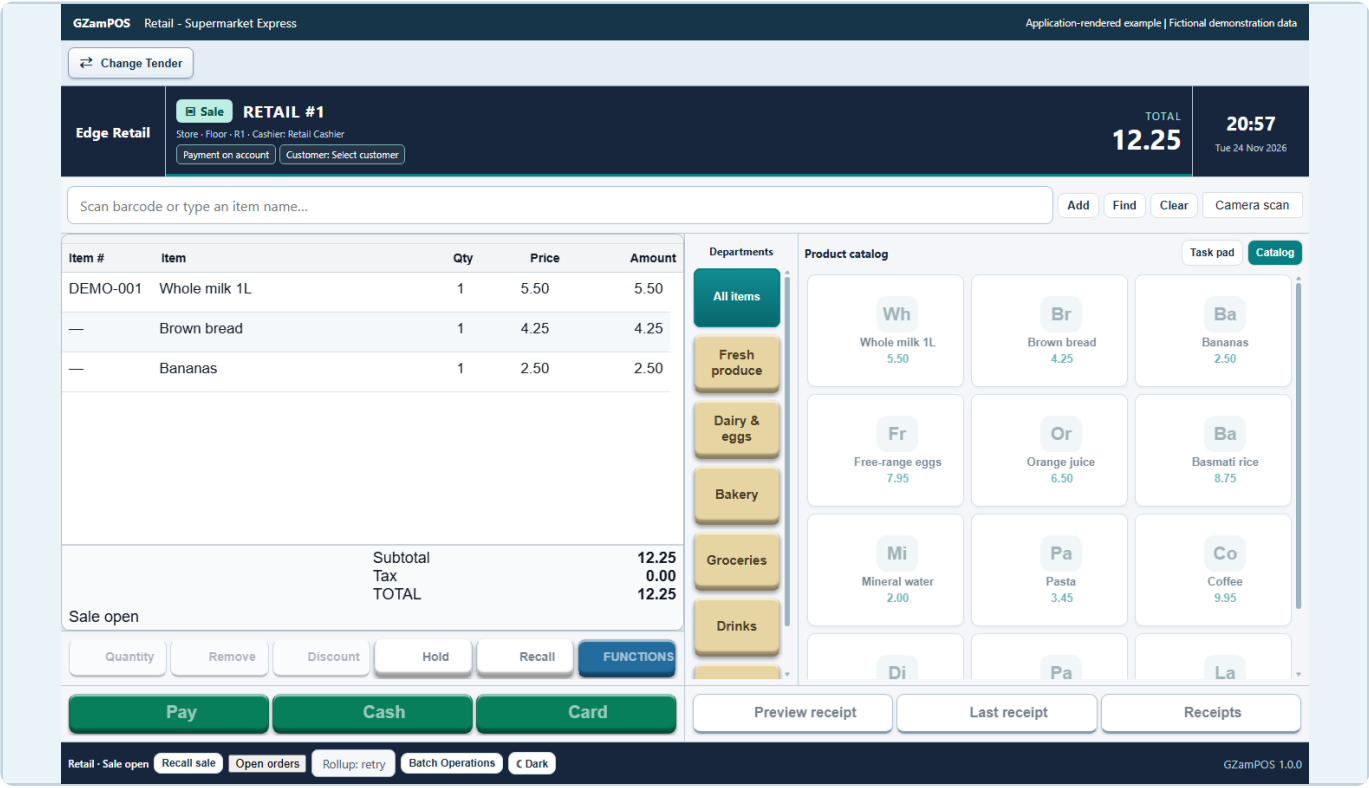

Auto accessories & specialty retail
Automotive accessories and other product-led specialist shops.

Your products. Your departments. Your workflow.

Ask us to demonstrate your own product range, pricing, customer offers and reporting needs. Sector-specific requirements are reviewed during setup.

Make every checkout count.

Give your team a clear place to sell - and give customers more reasons to come back.

Retail catalogue and sales journal. Actual application rendering; fictional demonstration data.

Scan, search and browse

Find items by barcode, search or department. Review quantities and prices in the journal.

Loyalty discounts

Recognize eligible customers with configured loyalty discounts that encourage repeat visits.

Vouchers and gift certificates

Support configured voucher and gift-certificate programs, including issuance and redemption workflows.

Email receipts

Send receipts from the register through configured company email delivery. Offer customers a convenient digital copy.

Flexible tender methods

Record cash, card and other configured tenders, with payment amounts and remaining balance clearly shown.

Customer accounts

Maintain customer records and support authorized account sales, collections and credit controls.

Pricing and promotions

Use configured pricing, discounts and promotional offers to support your selling strategy.

Receipts and corrections

Find saved receipts and handle permitted returns, voids and corrections with the appropriate controls.

Know your stock.
Stay in control of your day.

Bring front-counter activity and backoffice management into a shared business workflow.

Illustrative stock-management scene (AI-generated).

Stock and purchasing

Organize products and departments, track inventory movements, and manage purchasing, suppliers and adjustments. Make replenishment decisions with better information.

Staff accountability

Configure access by responsibility. Control who can discount, void, refund, view reports or change administrative settings.

Cash and closeout

Group activity into batches, compare expected and counted tenders, review differences and retain a clearer closeout trail.

Online reporting

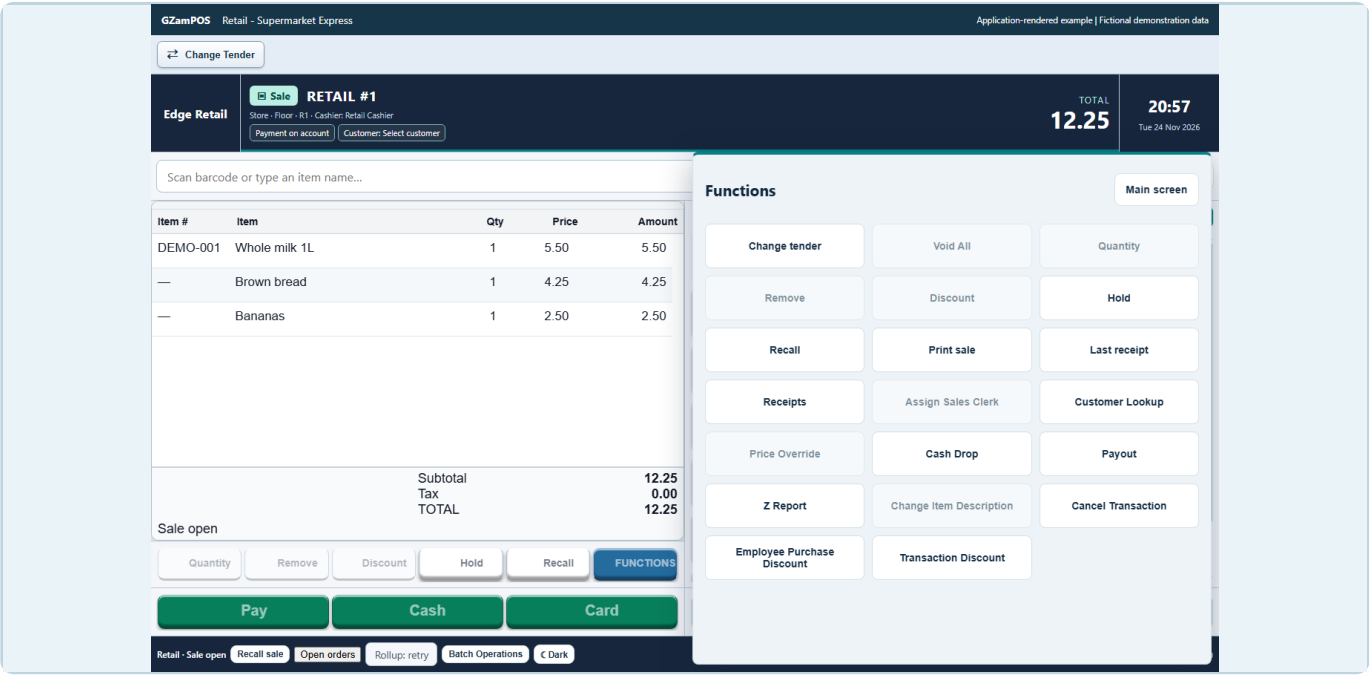

Give authorized users access to configured online reports to review business activity without relying only on the checkout screen.

Protect the work you put in

Local backup and recovery tools help you plan for updates and interruptions. Agree backup schedules, retention and recovery responsibilities for your chosen deployment.

Connected by design. Configured for your business.

A forward-looking retail platform with practical choices for how your team works today.

Functions workspace. Available actions depend on staff permissions and company configuration.

Different devices

Use Windows computers and touch-screen terminals, with compatible browser and tablet setups. Connect qualified scanners, receipt printers and cash drawers.

Very customizable

Adapt screen layouts, department buttons, product images, supported colours and button styles. Configure receipts, workflows and staff permissions.

Multi-currency trading

Configure currency-aware tender methods and exchange rates while keeping transaction totals in the company's home currency.

Cloud or local

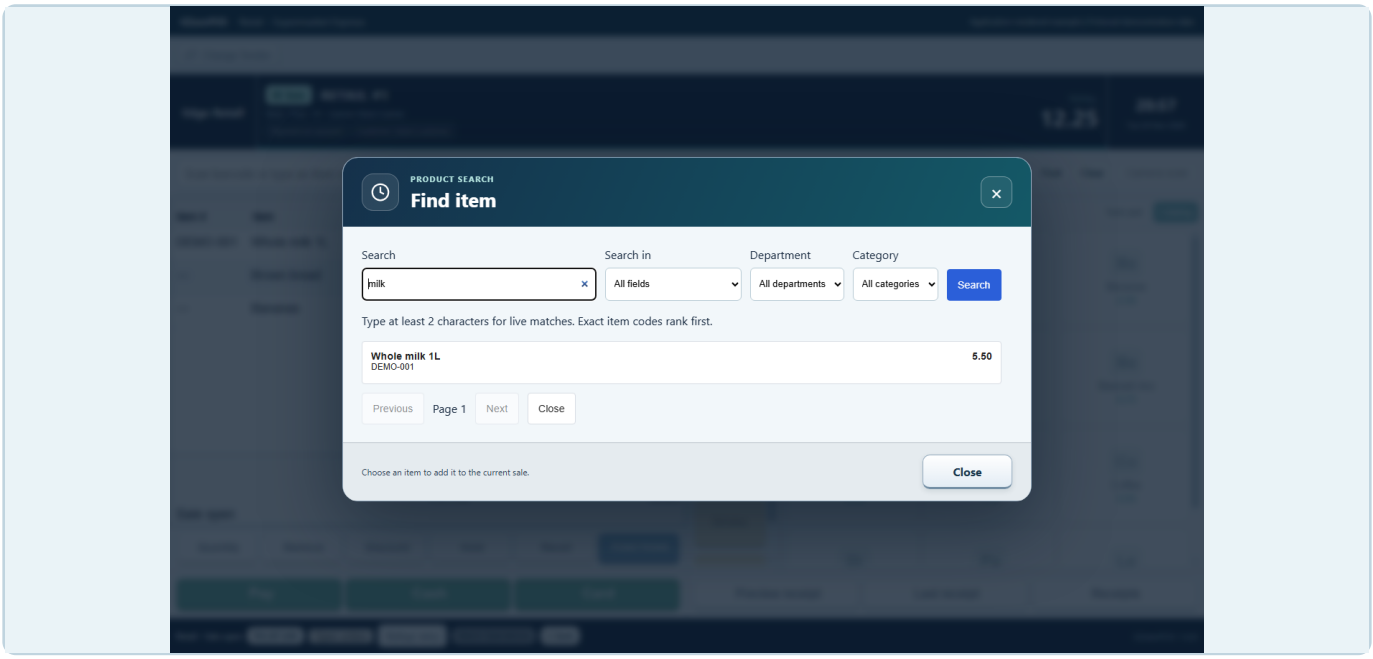

Choose hosted access or a designated local store server. Match the deployment, connectivity and maintenance plan to your operation.

QuickBooks Desktop + QuickBooks Online

Connect store activity with accounting through account mappings, reviewed exports and posting confirmation. Supported QuickBooks Desktop integration uses the Windows bridge; QuickBooks Online connects through its online authorization workflow.

Confidence at every register.

Useful business controls, clear transaction records and a considered approach to access and recovery.

Item lookup in the actual retail application. Demonstration data; not a customer installation.

Individual access

Staff sign-in and configurable permissions help separate cashier, supervisor and administrative responsibilities.

Protected connections

HTTPS connections and company-scoped access help protect the route between authorized users and their business records.

Credential protection

Password/PIN hashing and protected local credential storage are part of the supported configuration - without exposing secrets in everyday screens.

Recovery safeguards

Encrypted complete-recovery backups are available for supported local setups. Restoring pauses QuickBooks sending until reconciliation is reviewed.

See your store in GZamPOS.

Book a demonstration for your type of store: checkout, loyalty discounts, vouchers, email receipts, stock control, online reporting and QuickBooks integration.
